

Managing calls and calling

Use handy built-in features to help you make and manage your calls.

All the standard features like mute, hold and speed dial numbers are included, but you can also do much, much more.

[Call phones and cell phones](#) Make low cost calls to phones and cell phones and also get great rates calling long distance and internationally too.

[Skype-to-Skype call](#) Free calls to people who are also on Skype – anytime and no matter where they are.

[Conference call](#) Talk to up nine other people on a free conference call.

[Skypecasts](#) Join live conversations, connect with new people and have fun.

[Call forwarding](#) Have your calls follow you on to your phone and answer them no matter where you are.

[SkypeFind™](#) Read reviews of businesses the Skype community has recommended and call them. Or add your own.

[Auto Redial](#) Simply dial once. If busy, the number will be redialled until it gets picked up.

You get the added bonus of being able to [filter your search](#) for contacts making it quicker to find the person you want to call. You can even [group your contacts](#) under different headings depending on what you normally contact them about.
